 Information Display and Solutions

Shape Immersive Moments. Share Innovative Experience.

Believe your business should be more impactful and iconic. LG Business Solution is here to realize the true potential of your business.

Display all your boundless ideas on digital signage and watch the technology of LG Business Solutions shapes them into immersive moments.

Make your ideas more outstanding through reality and vividness beyond your imagination and interactivity that allows people to engage.

All immersive moments combines to create innovative experience for your business.

LG webOS

Smart Signage Platform

Self-Playing and Scalable Smart Display

webOS is a web-based multipurpose platform in which a variety of web applications are implemented, providing smooth content playback without a separate media player. Powered by built-in SoC, it can execute several tasks at once, and various external sensors can be simply added for differentiated customer interaction solutions.

Powerful Visual Performance

Several different videos* can be played simultaneously via web apps, and various animation effects such as scaling or rotating, are added to content using CSS (Cascading Style Sheets) transition effects. Real-time streaming** is also available, providing the flexibility to organize and diversify content free from capacity limits.

* The current 2 video tags may expand to 4 video tags in the 3Q of 2019.
** Available protocols may vary in different webOS versions.

Embedded Content Management System

webOS offers an embedded content management system equipped with an intuitive GUI, meaning that first-time users won't have to go through a complicated learning process in order to manage content. If you want to operate multiple displays in your own place of business, it is especially easy to group and manage them using the Group Manager*, without the need for a separate PC or software.

* The Group Manager is available for webOS 3.0 or higher.

Real-Time Remote Monitoring and Control

Through the Control Manager*, the embedded web monitoring solution, you can control and monitor the status of multiple displays in different locations in real-time. It is also available on internet-connected mobile devices.

* The Control Manager is available for webOS 3.0 or higher.

| OLED

Artistic Space beyond Display

Beyond its informative features, LG OLED signage delivers unsurpassed advertising effectiveness, redesigning space as a prestige-enhancing landmark with perfect colors and innovative forms.

Transparent LG OLED Signage

LG has developed another amazing innovation that has turned imagination into reality. LG Transparent OLED signage illuminates spaces which had previously been hidden behind a screen. Expressing vivid and clear colors while maintaining high transparency, it highlights and enhances the understanding of the objects behind it while giving viewers an extraordinary media experience.

Unrivaled Picture Quality

Perfect Black

Limitless contrast and the deepest blacks
Self-lighting pixels switch off completely to reproduce absolute blacks with no light bleed, offering infinite contrast

LCD

LG OLED Signage

Stunning Color & Contrast

Accurate & intense color reproduction
Self-lighting pixels bring colors to life with superb accuracy.

LCD

LG OLED Signage

Perfect Viewing Screen

Wide viewing angle
LG OLED Signage delivers awe-inspiring picture quality across the entire screen, even from wide viewing angles.

Perfect Design

LG's OLED technology realizes design flexibility with unbelievably lightweight and slim display.

How LG OLED makes a great innovation?

LG's OLED does not require a backlight unit nor a liquid crystal layer, which enables perfect black and slimmer design. It overcomes the limits of current LCD displays in terms of picture quality and design flexibility.

| COLOR TRANSPARENT LED FILM

Seamlessly Color Your Space and Brand

LG's revolutionary Color Transparent LED film endows the glass surface or window to which it is attached with a mystical beauty full of vivid color, while interacting seamlessly with the surrounding environment.

High Transparency

High transparency (73%*) allows glass to remain visible even after attaching the color transparent LED film, with no adverse effects on the original design. Displaying dynamic content as digital signage, it blends into the glass as well.

* 73% transparency is similar to that of a car's tinted front window.

Full Color Expression

LG Color Transparent LED film delivers a surprisingly wide range of colors using a 24 mm pitch, while still maintaining a high transparency. Applications are not confined to delivering simple brand logos or pictograms, but can be extended to display an entire video or pictures in which various colors are combined.

* Indoor installation only

Self-adhesive Film

The transparent LED film is self-adhesive, so it can be easily attached to the surfaces of existing window glass without the need for any complicated construction.

Superb Expandability and Flexibility

The size and layout of the film can be customized to fit in to the installation area. It can be expanded by adding more films in a vertical or horizontal way, or cut in parallel with the bezel to meet size requirements.

* The film must be cut in parallel with the the bezel by 1 pixel.

Curved Format Supported

The transparent LED film supports curvatures up to 1,100R concave for curved glass or window applications. This allows a wider range of venues to be redesigned as a landmark.

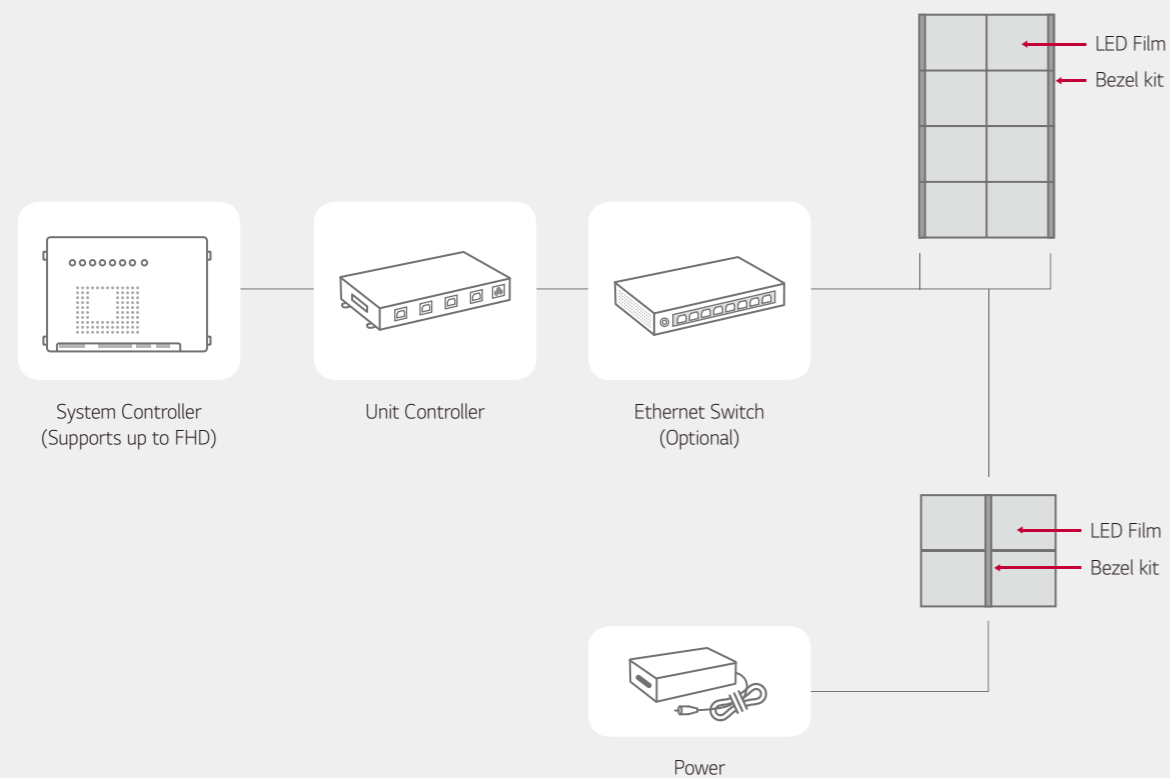

* Models may vary by region. Check with local sales for availability.

INDOOR LED SIGNAGE

Achieving Superb Picture Quality with Various Designs

Full model line-up, ranging from the Premium Fine-pitch series to the Curved series, LG Indoor LED Signage provides a variety of customizable options to fit into whatever spaces you need it to.

Uniform Picture Quality

Every step from production is strictly managed, while factory calibration ensures consistent quality between the LED units. The display provides seamless content with 97%* brightness uniformity.

* LAPE series: 95%

Vividness with Color Accuracy

LG's rigorous quality standards also make LG LED signage reproduce accurate colors, vividly displaying the original colors of objects without distortion.

16-Bit Color Processing

16-bit* color processing provides a higher greyscale level, which seamlessly displays different depths and densities of colors without distortion, thereby giving a more realistic and sophisticated content.

* Available for the LAPE/LAP Premium Fine-pitch, LAS Fine-pitch series

Reliable Operation with Signal/Power Redundancy

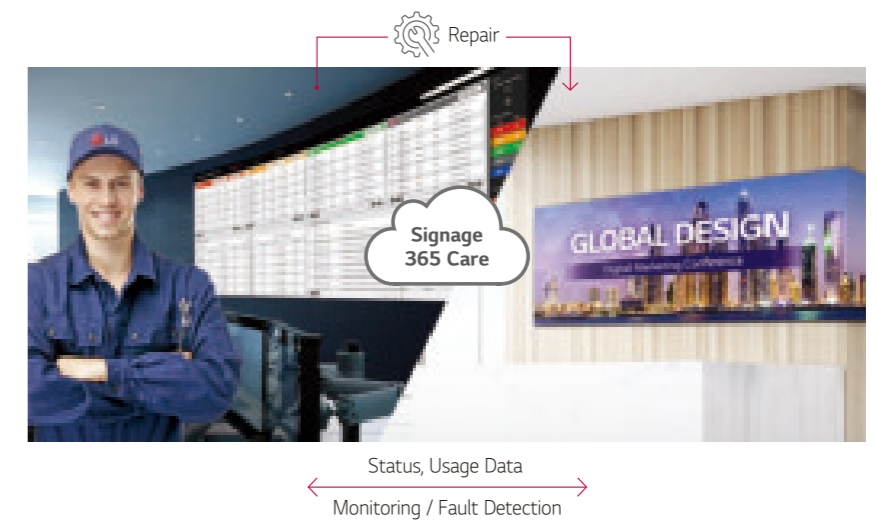

With an additional controller and power Unit, a back-up controller activates if a signal transmission error occurs, preventing a screen blackout error (Signal Redundancy*). The product also offers Power Redundancy*. Two power units are provided in every LED unit; one activates to provide power when the other fails.

*Support may differ by model series

Real-Time 365 Care Service

The maintenance gets easier and faster with an optional service Signage 365 Care*, a cloud service solution provided by LG service. It remotely manages status of LED displays in client workplaces for fault diagnosis and remote-control services, ensuring the stable operation of a client's business.

* The availability of "Signage 365 Care" service can differ by region, model series.

RoHS Certified Safe Product

Boasting RoHS certification, all LG LED signage models are environmentally-friendly products that do not use materials harmful to the environment and people.

Premium Fine-pitch LAP/LAPE Series

- Pixel pitch: 1.0 mm (LAP), 1.5 / 2.0 / 2.5 mm (LAPE)
- Brightness (After calibration): 1,000 cd/m²*
- Serviceability: Front and rear (LAP: rear only)
- Curvatures: Concave/convex 1,000R (LAPE only)
- Available in two models (LAPE series): Remote power and embedded power.

* Embedded power model: 700 cd/m²

130" All-in-one Screen LAAF Series

- Pixel pitch: 1.5 mm
- Brightness (After calibration): 500 cd/m²
- 130" single-set design (FHD)
- Built-in controller and PSU (Power Supply Unit)
- Embedded sound

Fine-pitch LAS Series

- Pixel pitch: 1.26 / 1.45 / 1.58 / 1.89 / 2.52 mm
- Brightness (After calibration): 600 cd/m²
- Serviceability: Front
- Cableless installation

* Models may vary by region. Check with local sales for availability.

Standard LAS Series

- Pixel pitch: 2.5 / 3.9 mm
- Brightness (After calibration): 1,000 cd/m²
- Serviceability: Front
- Fast installation and teardown for rental solution

Standard LAE / LAE-Q Series

- Pixel Pitch: 2.97 / 3.9 mm (LAE),
2.6 / 3.91 mm (LAE-Q)
- Brightness (After calibration): 1,200 cd/m²
- Serviceability: Front or rear
- Simple locking system
- Fast installation and teardown for rental solution (LAE only)

Curved LAC Series

- Pixel pitch: 2.5 / 2.9 / 2.97 / 3.9 / 3.91 mm
- Brightness (After calibration): 1,200 cd/m²
- Serviceability: Front or rear
- Curvature: concave/convex 1,430R

Controller	LCLG003			LCLG005				

1) LDM + Unit Frame + Power Gender (Except LED Controller, System Controller, PSU)

2) LDM + Unit Frame + Power Pack (Except LED Controller, System Controller)

3) Features from System Controller

*Specifications are subject to change without notice and the lifetime (Half brightness) spec is subject to LED package spec.

		All-in-one Fine-pitch Screen LAAF Series
Model Name		LAA015FL6B1
Physical Parameters	Pixel Pitch (mm)	1.5
	LED Type	3 in 1 SMD
	Resolution (W × H, per Unit Frame)	640 × 360
	Dimensions (W × H × D, per LDM)	240 × 180 × 10.5 mm
	Dimensions (W × H × D, per Unit Frame)	960 × 540 × 127.4mm
	Weight (per Unit Frame)	Master 20 kg, Slave 19 kg
	Weight (per SQM)	36.8 kg
	IP Rating	N/A
	Unit Frame Material	Front : Die Casting Aluminum, Rear : PC+ABS
	Unit Frame Color	Front : Black, Rear : Titan Silver
	Curvature	N/A
	Service Access	Front and Rear
	Optical Parameter	Brightness (After Calibration)
Contrast Ratio		6,000:1
Viewing Angle (H × V)		160 × 140
Bit Depth		16bit
Brightness Uniformity		≥ 95%
Color Uniformity		±0.015Cx, Cy
Color Gamut		NTSC 100%, BT2020 94%
Color temperature - Default		6,500K
Color temperature - Adjustable		3,200 - 9,300K
Electrical Parameter	Video Frame Rate	50/60Hz
	Input Power Range	100-240V~, 50/60Hz
	Power consumption - Max/Typ (per Unit Frame)	Master : 410/210 W (TBD), Slave : 390/200 W (TBD)
	Power consumption - Max/Typ (per SQM)	760/90 W (TBD)
	Power consumption - Max/Typ (130")	3,530/1,810 W (TBD)
	Refresh Rate	1,920Hz
Connectivity ¹⁾	Redundancy	N/A
	Video Inputs	HDMI In (3), DP In, USB
	Control	RJ45 IN, RS232C In/out
	Special Features	Temperature Sensor, Ambient Light Sensor, Crestron Connected ²⁾
Operation Conditions	Working Temperature/Humidity	0°C to 40°C / 10% to 80%
	Storage Temperature/Humidity	-20°C to 60°C / 5% to 85%
	LED Lifetime	100,000 hrs
Certification	Safety	IEC 60950-1 / EN 60950-1 / UL 60950-1
	EMC	FCC Class "A" / CE / KC
	Environment	RoHS

1) Master Unit Frame

2) Network Based Control

| OUTDOOR LED SIGNAGE

Offering Outstanding Visual Impact with High Durability

Diverse models available in a range of IP rated casing designs for outdoor applications including in stadiums, for advertisements and public displays.

Uniform Picture Quality

Every step from production is strictly managed, while factory calibration ensures consistent quality between the LED units. The display provides seamless content with 97% brightness uniformity.

Vividness with Color Accuracy

LG's rigorous quality standards also make LG LED signage reproduce accurate colors, vividly displaying the original colors of objects without distortion.

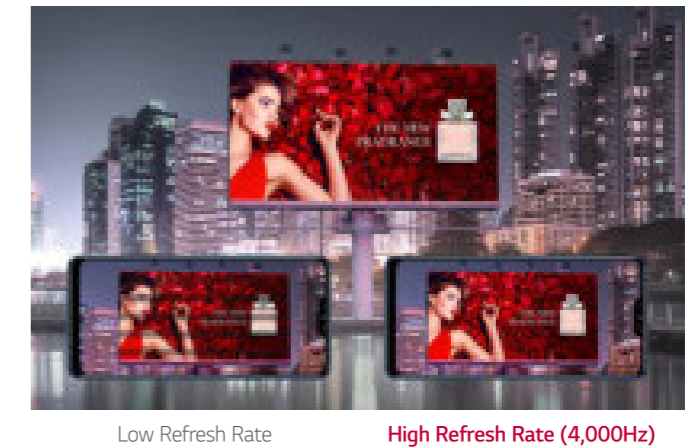

Outstanding Visibility

Offering powerful max. 8,000 cd/m² brightness, this super-bright display excels outdoors even in direct sunlight, instantly captivating attention and effectively delivering content.

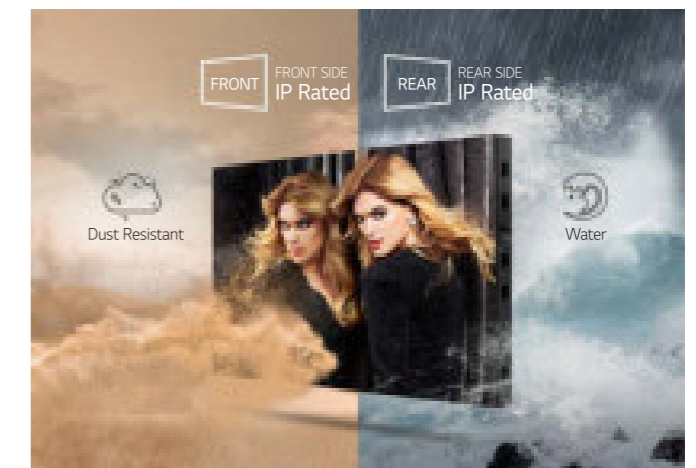

Smooth Playback in Dynamic Motion

A high refresh rate of max. 4,000Hz ensures smooth playback. Flicker-free images prevent the black bars that appear in video recordings, as well as viewer eye strain and blurred vision.

Reliable Weatherproof Design

The design of the front and back of the LED cabinet has IP-rated durability. This keeps it resistant to dust and moisture penetration, allowing stable operation unaffected by weather and harmful outdoor environments.

RoHS Certified Safe Product

Boasting RoHS certification, all LG LED signage models are environmentally-friendly products that do not use materials harmful to the environment and people.

* Models may vary by region. Check with local sales for availability.

Stadium
LBS Series

- Pixel pitch: 6.0 / 8.0 / 10.7 / 12.0 / 16.0 mm
- Brightness (After calibration): 6,000 cd/m²
- IP (Front/rear): IP65/54 (LBF160DA1D: IP65/43)
- Refresh rate: 4,000Hz

DOOH
LBS Series

- Pixel pitch: 6.25 / 8.33 / 10.0 mm
- Brightness (After calibration): 6,000 cd/m²
- IP (Front/rear): IP66/66
- Refresh rate: 4,000Hz

DOOH
LBE Series

- Pixel pitch: 4.0 / 8.0 / 10.0 mm
- Brightness (After calibration): 5,500 cd/m² (LBE080/100DD3)
5,000 cd/m² (LBE040/080/100DD4)
- IP (Front/rear): IP65/54
- Die cast aluminum frame design

Standard
LBE Series

- Pixel pitch: 3.91 / 4.63 / 6.94 mm
- Brightness (After calibration): 5,500 cd/m² (LBE039/046/069DD3(D))
5,000 cd/m² (LBE039/046/069DD4(D))
- IP (Front/rear): IP65/54
- Lightweight and slim design
- Easy installation and teardown for rental solution

High Brightness
LBH Series

- Pixel pitch: 10.66 / 16.0 mm
- Pixel configuration: Oval
- Brightness (After calibration): 6,000 cd/m² (LBH106VD3-B)
8,000 cd/m² (LBH160VD3DB)
- IP (Front/rear): IP65/65

HIGH BRIGHTNESS

Outstanding Visibility with Reliable Performance

With superior picture quality and excellent durability, the display's eye-catching content will captivate customers even under direct sunlight or extreme environmental fluctuations.

Captivating High Brightness

LG high brightness displays provide a variety of options, from window-facing to outdoor floor-standing displays, tailored to the requirements of each space. No matter where they are installed, the visual impact they bring maximizes advertising effectiveness by catching the attention of passersby.

☀️ 4,000 - 1,500 cd/m²

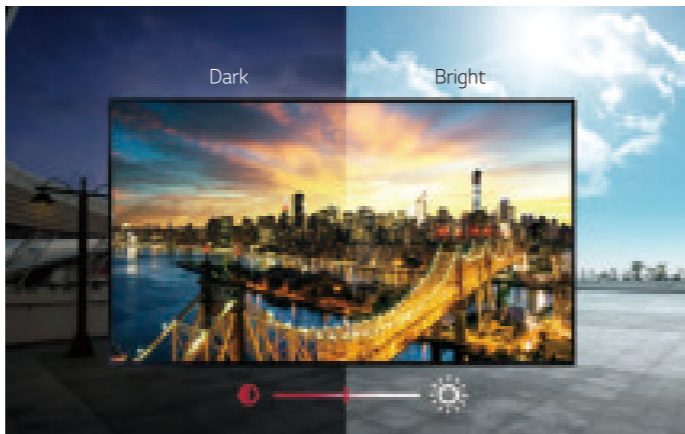

Visible with Polarized Sunglasses

QWP (Quarter Wave Plate) is applied, which enables clear visibility even when the viewer is wearing polarized sunglasses.

Auto Brightness Control

The screen brightness is automatically adjusted depending on the ambient light. The brightness is increased in light for better visibility, while it is decreased in darkness for efficient power management.

Auto Brightness

Conformal Coating

The product can be often unavoidably exposed to dust and water during maintenance. Conformal coating on every major circuit board eliminates such troubles by protecting it against dust, iron powder, humidity, etc.

Wide Range of Operating Temperature

The panel offers superb reliability under a wide range of operating temperatures*, so LG high brightness displays requires fewer constraints for installation, reducing additional costs for air conditioning system.

* The operating temperatures vary by model series.

Secured Protection with IP56 Design

Sealed with IP56* design for reliable operation, it is not only water proof but also weatherproof against the damaging effects of the sun, rain, snow, dust and wind, an essential feature for outdoor application.

* Exclusive to the XE series

webOS
Window Facing
75XS2E

- Ultra HD: 3,840 × 2,160
- Brightness (Typ.): 2,500 cd/m²
- Fan-less design for noise reduction
- Conformal coating on every circuit board

webOS
Window Facing
55/49XS4F

- Full HD: 1,920 × 1,080
- Brightness (Typ.): 4,000 cd/m²
- Operating temperature: 0°C to 45°C
- Conformal coating on every circuit board

* Models may vary by region. Check with local sales for availability.

webOS
Open Frame
75XF3C, 55/49XF3E

- Ultra HD: 3,840 × 2,160 (75")
Full HD: 1,920 × 1,080 (55"/49")
- Brightness (Typ.): 3,000 cd/m²
- Operating temperature: 0°C to 50°C
- Conformal coating on every circuit board

webOS
Open Frame
75XF3ES

- Ultra HD: 3,840 × 2,160
- Brightness (Typ.): 3,000 cd/m²
- Operating temperature: 0°C to 50°C
- Smart brightness compensation
- Optimized design for double-sided display
- Conformal coating on every circuit board

webOS
Open Frame
32XF1E

- Full HD: 1,920 × 1,080
- Brightness (Typ.): 1,500 cd/m²
- Operating temperature: 0°C to 50°C
- Conformal coating on every circuit board

* Models may vary by region. Check with local sales for availability.

webOS
Outdoor Display
86XE3FS

- Ultra HD: 3,840 × 2,160
- Brightness (Typ.): 3,000 cd/m²
- Operating temperature: -30°C to 50°C
- IP56 design
- Advanced thermal management (Filter-less)
- Smart brightness compensation
- Conformal coating on every circuit board

webOS
Outdoor Display
55/49XE4F

- Full HD: 1,920 × 1,080
- Brightness (Typ.): 4,000 cd/m²
- Operating temperature: -30°C to 50°C
- Slim and lightweight design for easy installation
- IP56 design
- Advanced thermal management (Filter-less)
- Conformal coating on every circuit board

webOS
Outdoor Display
75XE3C

- Ultra HD: 3,840 × 2,160
- Brightness (Typ.): 3,000 cd/m²
- Operating temperature: -30°C to 50°C
- IP56 design
- Advanced thermal management (Filter-less)
- Optional stand accessory available
- Conformal coating on every circuit board

webOS
Outdoor Display
49XE3E

- Full HD: 1,920 × 1,080
- Brightness (Typ.): 3,000 cd/m²
- Operating temperature: -30°C to 50°C
- IP56 design
- Replaceable front protective glass
- Optional stand accessories available (1×1, 1×3)
- Conformal coating on every circuit board

| VIDEO WALL

Artistic Immersion, Overwhelming Captivation

Seamlessly assembled on a large video wall screen, the impressive immersion generated by LG's extremely narrow bezel provides an extraordinary viewing experience.

**Groundbreaking
0.44mm Even Bezel**

LG introduced a groundbreaking bezel under 1 mm wide, which is almost as fine as the line drawn by a 0.4 mm ballpoint pen. The 0.44 mm even bezel - verified by Nemko* - provides a perfect and authentic seamless view, presenting vivid color expression with zero-distortion and superior image quality.

* The 0.44mm even panel bezel and 0.88mm BtB size (borderless type, no metal bezel) have been verified by Nemko, a global institution that tests and certifies electrical equipment.

A World-Class Bezel

The borderless design, with even bezels*, enables immersive and seamless viewing experiences on assembled video wall screens.

* SVH7F: 0.44mm even bezel, VH7E/VM5E: 0.9mm even bezel

Uniform Brightness

LG's LED backlight technology guarantees high brightness uniformity to ensure a clear picture. It generates high visibility and a consistent brightness across the whole screen.

* 55SVH7F: 91% (13 points) /Other LG video wall series: 90% (9 points)
Results based on in-house testing. Actual test results may differ depending on environment and measuring equipment.

Higher Viewing Angle

Large screens are usually positioned higher than human-eye level, making uniform picture quality essential for video walls. The viewing angle* of the LG video wall series is high enough to display vivid colors throughout the screen with no distortion.

* 55SVH7F: 60° /Other LG video walls: 45°
Results based on in-house testing. Actual test results may differ depending on environment and measuring equipment.

Simple Adjustment for Picture Quality

LG's webOS based video wall boasts convenient functions* for maintaining consistent picture quality. The color temperature of the display can be easily adjusted in increments of 100K. In addition, you can modify each grey scale value to achieve more detailed and precise white balance adjustment. These are also surprisingly simple to manage using the remote control.

* Support may differ by model series

Image Gap Reduction

LG video wall includes an image improvement algorithm that can reduce image gaps among tiled displays when playing back videos. Objects located on the bezel boundaries are adjusted for a seamless viewing experience.

* Support may differ by model series

LAN Daisy Chain Performance

A LAN daisy chain* allows you to execute commands to control and monitor video walls and even update their firmwares at once.

*Support may differ by model series

* Models may vary by region. Check with local sales for availability.

| ULTRA STRETCH

Space Fitting Design for Effective Advertising

The unique bar-type displays are ideal for showing vertical or horizontal objects without truncation or compound content composed of video and text. Placed on pillars or any long structures, they provide an extraordinary viewing experience.

Extended Wide Format with UHD Resolution

This bar-type screen is the most promising display for advertisement and information delivery with clear and vivid colors, placed in anywhere.

Effective Content Delivery

Compound content composed of video and text can be organized flexibly as the user sees fit, something which ordinary displays with a 16:9 ratio fail to achieve due to space limitations. Also, vertical or horizontal objects are seamlessly shown, providing realistic viewing experiences.

Multi Screen Mode with 4PBP

The usability of Ultra Stretch displays is maximized with PBP (Picture-by-Picture) feature. A variety of images and information can be delivered simultaneously in portrait or landscape orientation, making it appear that multiple displays are being used.

Easy Content Editing via SuperSign Media Editor

With the LG SuperSign Media Editor, users can not only create content using various images or a video clip, but also easily edit original content to fit 58:9 or 32:9 unique ratio.

LAN Daisy Chain Management

A LAN daisy chain is supported, allowing you to execute commands to control and monitor the displays and even update their firmware.

* Models may vary by region. Check with local sales for availability.

INTERACTIVE

Smart Collaboration beyond Touch Experience

The LG Interactive Digital Board (IDB) boosts meeting productivity by encouraging participants to freely share their ideas on the screen using intuitive touch and embedded collaboration solutions.

Outstanding Touch Performance

With the advanced built-in touch displays and high-performance SoC, the screen recognizes even the smallest points and instantly shows the response to the touch point. So, various touch-based solutions can be applied for customer interactions.

Smart Collaboration beyond Touch Experience

For effective collaboration, the embedded IDB (Interactive Digital Board) app offers user-friendly writing software and collaboration solutions* which enable each participant to share their laptop screens, write on the shared screens, and save annotations.

* Support may differ by model series

Multi Touch Experience

Capable of recognizing multi point-touches* at once, the screen enables various touch applications to be applied as well as provides users more realistic and interesting touch experiences.

* Touch points can vary depending on the models and connection environment.

Vivid Color Details with Ultra HD

With LG IDB's UHD resolution*, users can view content in the finest detail, even with full zoom-in. UHD provides the highest-quality media experience at four times higher definition than FHD.

* Exclusive to the 86TR3E, 75TC3D, 55TC3CD model

FULL HD

ULTRA HD

Easy Touch Navigator on Display

Providing optimal ease of use, LG IDB users can run desired functions or change settings by softly pressing the screen to call up the Touch Menu*.

* Support may differ by model series

** The menu design (GUI) may differ by model series.

Compatibility with AV Control System

LG touch displays have been certified Crestron Connected® for a higher level of compatibility with professional AV controls to achieve seamless integration and automated control*, boosting business management efficiency.

* Network-based control, except the 55TC3CD mode

| ULTRA HD STAND-ALONE

Absolute Color Vividness on Ultra HD Display

Vibrant colors and powerful performance bring content to life, effectively capturing the attention of passerby, driving traffic to the display's location.

Vivid Color Details with Ultra HD

The UHD resolution delivers more detailed and vivid content without distortion, with four times higher definition than FHD. LG UHD displays ensure stable UHD video playback by supporting HEVC (High Efficiency Video Coding). Moreover, LG IPS panel features a wide range of angle to display clear content regardless of the position of viewers.

Multi Screen Mode

PBP (Picture-By-Picture) features multi screen in a single display with upto 4 input sources while PIP (Picture-In-Picture) supports playing both main screen and sub screen at the same time with various layouts. This gives great flexibility to allocate space for each content source.

Compatibility with AV Control System

LG UHD displays have been certified Crestron Connected® for a higher level of compatibility with professional AV controls to achieve seamless integration and automated control*, boosting business management efficiency.

* Network-based control

Compatibility with Video Conference System

For the optimum visual meeting, LG UHD displays have certified its compatibility with Cisco Spark Room Kits, a system that offers powerful and integrated control* for a smarter video conference, eliminating a waste of time to set up the picture quality or to change input on incoming calls.

* Using an HDMI cable connection

Detachable Logo & Built-in Speaker

The detachable logo allows for installation in the desired orientation in landscape or portrait mode, making it easy for the user to arrange the signage. Also, sounds can be played from built-in speakers*, giving advertisements greater impact.

* Exclusive to the 86/75UH5E, 86/75UM3E models

Slim and Tidy in Appearance

Despite being a large-sized display, the LG UHD display still boasts a slim depth, a feature that makes installation easier by requiring less space. This display achieves an immersive view while maintaining a sleek look.

57.9 mm*

* Depth is based on the 75" model

* Models may vary by region. Check with local sales for availability.

| FULL HD STAND-ALONE

A Broad Range of Offers for Diverse Customer Values

Optimized for a variety of markets, LG's versatile standard displays provide value-added functions to effectively deliver advertisements and information to viewers.

Wide Viewing Angle

LG IPS panel technology provides better control of the liquid crystals, which in turn allows the screen to be viewed at virtually any angle. So it delivers stable and accurate colors no matter where viewers are.

Clear View with Non-glare Coating

Viewers can easily become frustrated by unnecessary reflections when watching a screen under brightly lit conditions. LG's high haze displays have resolved this problem by increasing the haze value up to 28%*, enhancing content visibility and text readability.

* Exclusive to the SH7PE-H, SL5(P)E-H series

Multi Screen Mode

PBP (Picture-By-Picture) and PIP (Picture-In-Picture) feature* gives a chance to compose up to 2 divided split screen on landscape or portrait display format. This gives great flexibility to users to allocate space for each content source.

PBP

PIP

* For webOS signage models

Conformal Coating

The product can be often unavoidably exposed to dust and water during maintenance. Conformal coating on power board eliminates such circumstances by protecting it against dust, iron powder, humidity, etc.

Compatibility with AV Control Systems

LG Digital Signage has been certified* Crestron Connected® for a higher level of compatibility with professional AV controls to achieve seamless integration and automated control**, boosting business management efficiency.

* Except 23SE3TE, 22SM3B, SL5B series

** Network based control

Detachable Logo & Built-in Speaker

The detachable logo* makes it easy for the user to arrange the signage. Also, sounds can be played from built-in speakers**, offering viewers various multi-media experiences.

*Except the 23SE3TE, 22SM3B models

** Exclusive to the SH7(P)E, SH7DD, SM5KE, SL5(P)E, SE3KE, 22SM3B series

* Models may vary by region. Check with local sales for availability.

KIOSK

Harmonizes with any Environment

This floor-standing display delivers advertising and information 24/7 in any type of indoor facility. Featuring a sophisticated design with robust glass surface, it smoothly blends in with its surroundings.

Elegant and Sophisticated Design

The minimalist design, including its slim depth, makes it fit any space both physically and aesthetically, and the pure glass surface of its screen adds to the sense of sleek orderliness. In addition, the solid and high-quality aluminum material was given a hairline finish for a smooth surface and a feeling of exclusivity.

Protective Glass for Safety

The tempered front glass with shatter-proof film prevents pieces of broken glass from scattering and keeps them attached to the screen. It is the optimum protection for minimizing harm to the user, even in the event of an external impact.

Easy Content Management

There is no need for complicated system connections in order to play back content because the 49KE5E supports USB auto playback and scheduling, Wi-Fi or Wireless connection, and also offers a hidden space for media players.

* Models may vary by region. Check with local sales for availability.

Kiosk 49KE5E

LG TV Signage (Smart TV Signage)

Live TV and Advertisements on One Screen

Smart TV Signage enables both TV broadcasting and promotional display in one screen via a built-in TV tuner. With Smart TV Signage, managers can efficiently and timely deliver messages / promotion while customers enjoy watching live TV simultaneously.

Embedded Content Management & Group Management

Play and customize video content, schedule a playlist, and even group and control signages via remote control, mouse or even phone with the embedded Content Management & Group Management System. There's no need for a separate PC or software, making content management much easier and user-friendly.

USB Data Cloning

USB data cloning makes managing multiple displays more efficient for optimal operation. No need to set up each display one by one, data can be copied to a USB in one display, data will be distributed to other displays through a USB plug-in.

RTC

Save time and improve convenience with RTC (Real Time Clock). Even when the TV is off, time information is stored on the RTC module via an internal memory, so there is no need to sync time processes.

NTP

With NTP (Network Time Protocol), the TV receives real time updates from the network and synchronizes its time accordingly.

* Models may vary by region. Check with local sales for availability.

webOS PLAYER

Versatile Player Performing Value-added Solutions

Designed for LG digital signages, this player can execute several tasks at once while providing smooth content playback, expanding the role of displays to be tailored for each business.

Upgrade to the webOS 4.0 Smart Signage Platform

The WP400 may be applied towards any type of LG digital signages regardless of its platform.

webOS Box WP400

- LG webOS 4.0 smart signage platform
- Ultra HD video playback
- User-friendly UX
- Embedded CMS
- Compatibility with LG SuperSign solution and Signage 365 Care

Connectivity

Front

- 1 AC-IN
- 2 HDMI OUT
- 3 LAN IN
- 4 RS232C OUT
- 5 RS232C IN
- 6 IR IN
- 7 HDMI IN 1
- 8 HDMI IN 2

Back

- 9 DP IN
- 10 DP OUT
- 11 USB IN 1
- 12 USB IN 2

LG SuperSign - A Powerful yet Simple Software Solution

LG SuperSign is a comprehensive and indispensable software solution for the integrated management of LG digital signages. Content creation and distribution gets easier and centralized monitoring and control become simpler, helping your business save time and cost, operate more effectively across its locations.

Overview

Content Management	SuperSign CMS	All-in-one content management software for editing, scheduling, distribution with various types of management tools.
	SuperSign Media Editor	Application for editing videos, which is specialized for LG Ultra Stretch signage or video walls with irregular layouts.
	LG Simple Editor	Simple content editing and distribution freeware dedicated for LG Smart TV Signage.
Control and Monitoring	SuperSign Control+	All-in-one control and real-time monitoring software in which all status of devices are recorded and alarmed.
	SuperSign Control	A software to control basic settings of limited amounts of displays.
Real-time Care Service	Signage 365 Care	Cloud based service featuring remote control and monitoring provided by LG customer service or system integrators.
White Balance Calibration	SuperSign WB	Calibration software for adjusting a video wall's white balance. Two modes using a camera and a sensor are supported.

SuperSign CMS

Versatile content management with enhanced usability

A variety of LG digital signages, whether stand-alone, outdoor, video walls, or LED signage, can be simultaneously connected and seamlessly managed by SuperSign CMS, with a single server. Administrators are free from the restraints of managing various display types and installation places, and they can operate an array of displays easily using a PC or mobile phone. Going a step further, SuperSign CMS offers OpenAPI, which allows system integrators to consolidate their solutions with SuperSign features and easily optimize them for LG digital signages, expanding the scope of its possible applications.

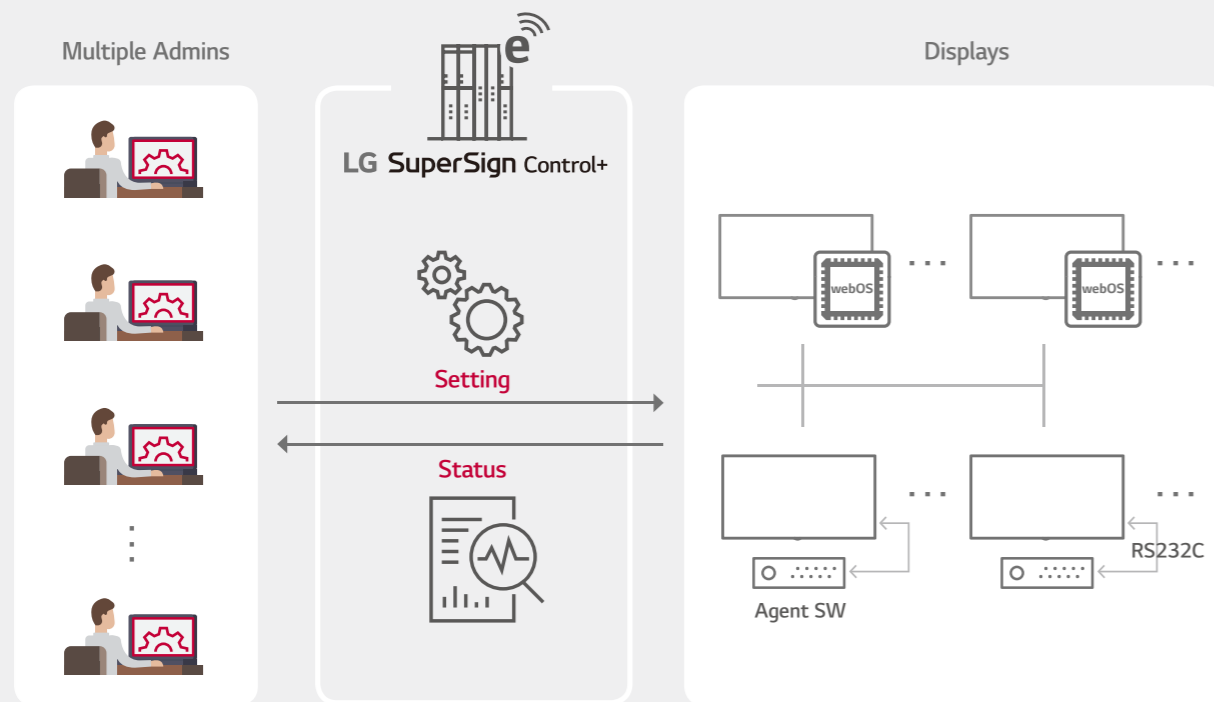

LG SuperSign - A Powerful yet Simple Software Solution

SuperSign Control+

Integrated Monitoring and Real-time Control

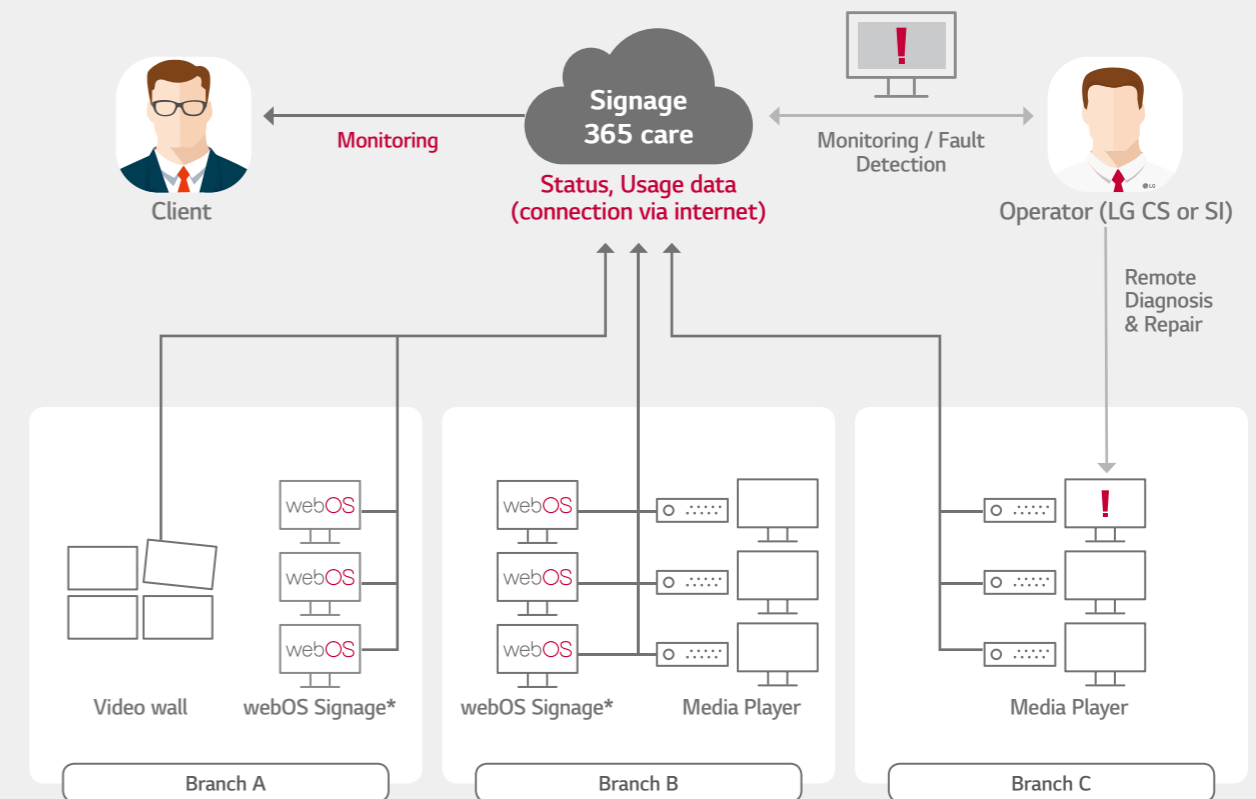

SuperSign Control+ is a remote control and monitoring software solution optimized for LG digital signages. It focuses on large scale deployment, supporting more than thousands of displays. Multiple accounts can access the SuperSign Control+ server via network to monitor the status of connected displays in real-time, control them, and adjust their setting values. As an ever-ready solution, it continuously monitors the status of displays and instantly sends out e-mail alerts to administrators when problems occur. Alerts and warnings can be customized according to various parameters such as power, fan and temperature as managers see fit.

Signage 365 Care

Real-time Monitoring and Fault Detection

Signage 365 Care is a cloud service solution for remotely managing the operating status of signage displays installed in client workplaces. Through this service, causes of the fault can be easily identified prior to onsite visit, which leads to less time and cost for troubleshooting, ensuring the stable operation of a client's business.

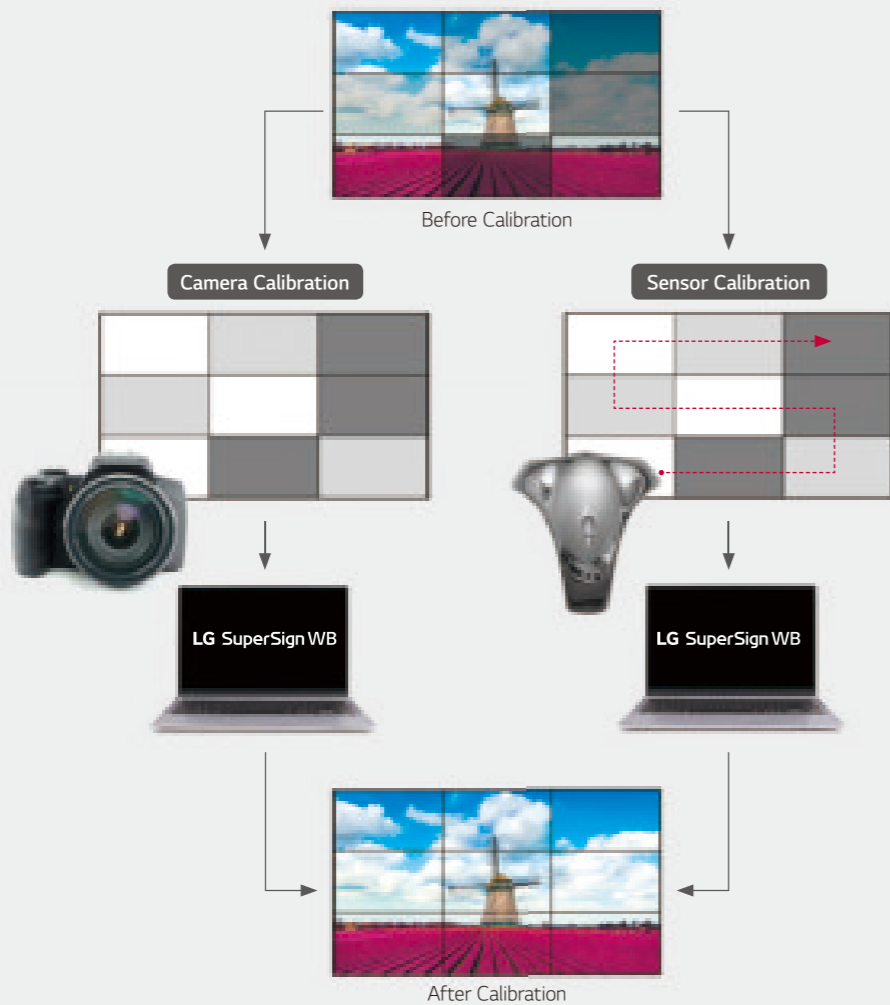

* The versions of webOS and displays supported are currently being expanded. For further details, please contact LG sales in your region.

LG SuperSign - A Powerful yet Simple Software Solution

SuperSign WB

Achieve Superb Color Consistency

Delivering stable and accurate color among connected displays is a key factor in determining the picture quality of a video wall. SuperSign WB adjusts the white balance to achieve this purpose by supporting camera and sensor calibration. Camera calibration* lets users save time and manpower due to a simpler process than traditional sensor calibration, but it can recognize up to 3x3 layouts. So sensor calibration** is recommended when a video wall layout has an irregular shape or is beyond 3x3 tiling.

* Supported camera models: Nikon D5300, D5500, D5600

** Supported sensor models: Spyder 3/4/5, i1 Display Pro, ACB8300, CA210/310

Camera Calibration

- Supported models : Camera calibration is restricted to video wall models in configurations of up to 3x3.
- For optimal calibration results, your camera and video wall must each be facing the front center of the other.
- Install your camera in a horizontal orientation. Positioning your camera vertically may cause monitor detection to fail, which will lead to improper calibration.
- Only video walls configured in a square formation can be calibrated. Irregularly installed video walls are not supported.
