

## VideoConferencing column

### **INT.1060** VideoConferencing floor to wall column up to 90 inch, 85 kg incl. 2 small supports

Videoconferencing is a set of interactive telecommunication techniques, which allows two locations to exchange information at the same time (with vision and sound). This form of visual collaboration is used by companies to meet with their subsidiaries or international partners saving travel costs and time. For videoconferencing, the end-user is often looking for a mobile solution to which two screens, a codec and a camera can be attached. The set would then be suitable for use in multiple rooms. SmartMetals has developed a wheeled stand, suitable for two displays up to 85 inch, with a codec and camera support. One of the following screen mounts should be added: 052.1000/.2000/.6000, which can be chosen based upon the weight and mounting pattern of the screen.

## VideoConferencing column

### Features

**Minimum length:** 1250 mm

**Maximum length:** 1600 mm (centre screen)

**Weight:** 34.00 kg

**Colour:** Dark grey, Aluminium

**Maximum load:** 85 kg

**Screen position:** Landscape, Portrait

**Inch range:** max. 90 inch

**Mobile / fixed:** Fixed

**Height adjustment:** Manual

**Bracket/interface:** Excluded

**Type bracket/interface:** Universal

**Mounting system:** 170 x 140 mm

**Cable duct:** 25 mm Ø
