

ATOM GRIP (AG02-A)

The Rigtec Atom Grip is the essential projector hanging bracket. Offering a feature packed solution to safely and securely suspend your projector from a truss or bar.

Get creative with your projection installations. The Atom Grip unlocks the full potential of the Rigtec Air Frame, allowing single point hanging for landscape, portrait or floor projection.

Suspend stacked projectors securely with the Atom Grip. With a WLL of 245KG, the Atom Grip is capable of suspending multiple projectors stacked in Rigtec Air Frames from a single point, reducing set up time without sacrificing the safety of the install.

Ultimate versatility, with 25° tilt and 360° rotation, the Atom Grip allows precision adjustments and a simple solution for creative angled projection set ups.

The Atom Grip is compatible with all Rigtec Air Frames.
